JAST Becomes a Member of the Association of Medical Databases in Japan

Japan System Techniques Co., Ltd. (Head office: Osaka; Representative: Takeshi Hirabayashi, President and CEO; JAST) has become a regular member of the Association of Medical Databases in Japan (AMDJ), a certified personal information protection organization, concerning JAST's medical data utilization business.

JAST creates services with the goals of converting medical data to an asset with value and of using ICT for the digital transformation of the business procedures of insurers. The company's mission is to use these services to extend the healthy life spans of the public and support health insurance for the people of Japan. These capabilities make JAST a one-stop source of support for the implementation of data health plans by health insurers. The Future Co-Creation Laboratory of JAST builds and provides medical databases by using health insurance invoice and health checkup data, all of which is anonymous, of more than 9 million people.

JAST plans to use its membership in the AMDJ, which is a certified personal information protection organization (see note), for more activities involving the protection of personal information and the use of data for the purpose of solving social issues involving health care and healthy lifestyles.

■ Association of Medical Databases in Japan

On February 27, 2017, the AMDJ was certified by the Minister of Economy, Trade and Industry under Article 47-1 of the Act on the Protection of Personal Information as a certified personal information protection organization. The objective of the association is to play a role in the sound growth of the medical database industry and improvements in the quality of life of patients and others by determining opinions and creating an environment for enabling the utilization with confidence of medical databases operated by private sector companies.

Note: Certified personal information protection organization

This is a legal entity that has been certified by the Personal Information Protection Committee as an organization established for the purpose of performing activities that promote measures for the protection of personal information by private sector companies in specific industries and business categories.
