**JAST Starts Sales of Smartphone App of the Insurers Business Support System (iBss)**

Japan System Techniques Co., Ltd. (JAST) will start sales in April 2024 of an iBss (Insurers Business Support System) app that the was developed by JAST. iBss is a system for insurers that helps improve the efficiency of insurance business processes.

Introduced by JAST in October 2020, iBss is now used by more than 120 insurers. This app was developed in response to requests from customers for a comprehensive service extending to measures to stay healthy in order to make iBss even easier to use. The new app can be used seamlessly with new functions and existing services such as medical expense notices, notices to increase the use of generic drugs, and applications for influenza vaccine subsidies.

■ **Main Functions of the iBss App**

- Walking functions (pedometer and walk rally)
- Recording of vital signs (weight, body mass index, blood pressure, pulse)
- Issuing/exchanging points (exchanges for digital gift cards, e-money, etc.)

Application screen

■ **Upcoming Activities**

iBss began as a system for determining if an individual meets the requirements to be a dependent of another person and subsequently expanded to become a system for insurance business processes and applications. In FY2023, JAST added a function for raising awareness of activities to stay healthy that uses information in health insurance invoices and regular medical examination data. In FY2024, a pedometer and point issuing and exchanging capability were added to strengthen the health awareness function. To make iBss even better, JAST plans to further upgrade business process efficiency functions, which have an excellent reputation among many insurers. JAST is firmly committed to making iBss even more useful and convenient for insurers and the people they insure in order to contribute to progress with the digital transformation of the insurance industry.
